AMIR SAMI BADDOUR

Junior Backend Engineer · Java · SQL · REST APIs · CI/CD

Chouf, Lebanon | (+961) 81 384 689 | amirsbaddour@gmail.com | linkedin.com/in/amir-baddour | github.com/Amir-Baddour

PROFESSIONAL SUMMARY

Junior backend engineer with hands-on experience building, testing, and deploying REST APIs and database-driven applications. Developed AirdropX, a deployed multi-tenant platform using Java 17 and PostgreSQL, with 30+ API endpoints, concurrency-safe business rules, background processing, and 100 automated tests and integration checks. Skilled in SQL modeling, transactions, layered architecture, Docker, and CI/CD; experienced collaborating with senior engineers and reviewing AI-assisted code.

FEATURED PROJECT

AirdropX — Multi-Tenant Airdrop Campaign Platform (Web2, Simulated Payouts) | Sep 2026 – Present

Java 17 · Spark Java · JDBC · PostgreSQL · Maven · JUnit 5 · React/TypeScript · Docker · GitHub Actions | Live demo · Source

- Developed 30+ REST endpoints for companies, campaigns, recipients, task verification, public claims, review queues, and administration within a layered API/Core/Infra architecture initially designed by a senior engineer.
- Implemented a concurrent payout worker using ScheduledExecutorService and PostgreSQL SELECT … FOR UPDATE SKIP LOCKED to prevent duplicate processing, with retry logic and recovery for stuck jobs.
- Protected claim limits and state transitions using row-level locks, transactions, unique constraints, and optimistic status guards; validated claim limits under 10 simultaneous requests.
- Built extensible task verification using the strategy pattern (quiz, secret code, manual proof), plus sliding-window rate limiting, hashed tokens, and tenant data isolation.
- Created 33 JUnit tests and 67 PostgreSQL integration checks, plus frontend tests; automated builds, tests, secret scanning (Gitleaks), and vulnerability scanning (Trivy) in CI.
- Deployed Dockerized services to a Linux server with approval-gated CI/CD, health checks, automatic rollback, HTTPS via Caddy, Grafana monitoring, uptime alerts, and nightly database backups.
- Used AI coding agents to support design, implementation, testing, and debugging while reviewing changes and managing deployment through pull requests.

WORK EXPERIENCE

.NET Developer Intern — Oqunet, Lebanon | Apr 2025 – Jun 2025

- Developed backend functionality for ASP.NET MVC applications, including routing, business rules, and input validation across multiple modules.
- Designed and consumed HTTP/JSON REST APIs; worked with MySQL data models, Entity Framework Core, LINQ, and version-controlled migrations.
- Collaborated with senior engineers using Git-based workflows, code reviews, and team development practices.

OTHER PROJECT

Digital Wallet Platform (Senior Project) — PHP, MySQL, REST APIs, React

- Developed PHP REST APIs for authentication, deposits, withdrawals, transfers, and cryptocurrency price feeds, with MySQL schemas, validation, and error handling.
- Resolved transaction-processing bugs during testing and integrated an ML feedback classifier that reduced manual review time by 70% in testing.

TECHNICAL SKILLS

Languages: Java, SQL, C#, PHP, JavaScript/TypeScript, Python

Backend: REST API design, Spark Java, JDBC, ASP.NET MVC, Entity Framework Core, LINQ, Node.js/Express

Java & concurrency: Collections, generics, records, exceptions, ExecutorService, ConcurrentHashMap, synchronization

Databases: PostgreSQL, MySQL; schema design, transactions, row-level locking, constraints, migrations

Testing & delivery: JUnit 5, integration testing, Vitest, Maven, Git/GitHub, GitHub Actions, Docker, Linux, Caddy, Grafana

AI tools: AI-assisted development, code review, prompt engineering, generative AI fundamentals

EDUCATION, CERTIFICATIONS & MORE

Bachelor’s Degree in Computer Science — Modern University for Business and Science (MUBS), Lebanon | 2021–2026

Certifications: AI Fundamentals — IBM (2026) · Career Essentials in Generative AI — LinkedIn (2025) · Advanced Full-Stack Software Engineering — SE Factory (2023) · Foundations of Computer Science — SE Factory (2024)

Languages: Arabic (native), English (fluent) Competition: Lebanese Collegiate Programming Contest (LCPC), 2024 participant
